DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a reflector, classified in class 362, subclass 348.
- II. Claims 14-33, drawn to a luminaire having a reflector, classified in class 362, subclass 297.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the embodiment of the reflector can be omitted in the light source. The subcombination has separate utility such as reflector with a light source or with natural lighting i.e. from the sun or can be used to reflect light from an object.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
